

PRE-HEALTH PROGRAM

Real Opportunities

Many of the fastest growing occupations in the country today are in the health sciences field. According to the U.S. Department of Labor, health sciences occupations are expected to generate as many as 3 million jobs by 2016.

Medicine has been described as both an art and a science. The Pre-Health programs at UW-Parkside reflect this dual perspective. Graduates are very competitive gaining acceptance to professional programs or jobs in related fields. This success is due in part to a well-developed program of advising, which includes course selection, admission test preparation, application assistance, and practice interviews.

We have 13 different Pre-Health Concentrations including: Pre-Medicine, Pre-Pharmacy, Pre-Veterinary, Pre-Physical Therapy, Pre-Optometry, Pre-Genetic Counseling, Pre-Osteopathic Medicine, Pre-Pathology Assistant, Pre-Podiatry, Pre-Occupational Therapy, Pre-Dental, Pre-Chiropractic, and Pre-Physician Assistant.

► **RUSCH program** – This unique medical education training program, created in partnership with the University of Wisconsin School of Medicine and Public Health, develops future medical practitioners who will address the shortage of doctors in underserved Wisconsin communities.
