

SOCIOLOGY

Real Opportunities

Get connected to your community - be it local, national or international. The Sociology department connects learning and experience. You learn to conduct research and analyze data, convey your ideas effectively in writing and presentations, practice critical thinking, gain global perspective, and prepare for graduate school.

The sociology department offers four different certificate programs that increase your competitiveness in the labor market, which is fast-changing, increasingly global, and technologically driven.

The jobs you may apply for as a graduate may not even exist yet. As society evolves, you as sociology major will have the tools to critically analyze the world and your place within it and the practical skills you need to succeed.
