

# ART

## Real Opportunities

Be an artist! The Art Department at UW-Parkside has some of the best studio classrooms in the region, a faculty of nationally recognized artists, and a supportive student community – all ready to help you realize your artistic potential! With options in drawing, painting, woodworking, sculpture, printmaking, ceramics, graphic design, and photography, Parkside's art program is bound to expand your talents and heighten your curiosity!

## Art + Art History

In addition to your studio coursework, the Art History sequence provides in-depth investigation of all art forms—from historical masterpieces to graphic novels, and from film to design. Add our liberal arts-focused general education requirements, and art students graduate with a vast array of professional and cultural skill sets.

## Amazing Results

Our graduates pursue careers in: graphic design, production design, illustration, art history, museum or gallery support, arts administration, architecture, freelance studio art, film making, and any opportunity that values creative problem solving, sophisticated visual communication, and independent thinking. Why would you want to do anything else?
